

## MEDICAL

Medical facilities are quite good, with **Dr Oen Hospital**, one in Solo Baru and a second one at Kandang Sapi being the most popular. They have an emergency room open 24/7, and also a polyclinic with general and specialist doctors.

Lately there have opened a couple of new hospitals, which are very modern equipped but not tested out yet. One is **Rumah Sakit Idriati** in Solo Baru (<https://rsindriati.com>) the other one is **Rumah Sakit JIH** (<http://rs-jih.co.id/rsjhsolo/>) near Fajar Indah.

There is a good orthopaedic hospital **Rumah Sakit Ortopedi Prof. Dr. Soeharso** near Universitas Muhammadiyah.

The new **Hermina Hospital**, at Jebres, is a good one specialized in maternity, <http://herminahospitalgroup.com/home/cabang/solo>

At **Budi Sehat** near Pasar Legi you can get a wide range of analysis. They also offer home visits from doctors!

Dentistry is both good quality and a fraction of the cost of western countries. **Dr Bambang** (Solo Baru), **Dr Shirley** (near Pasar Gede) and **Dr Christine** are three who have very modern facilities.

There are a number of good optometrists around Alun Alun Lor, and glasses and contact lenses are extremely cheap.

### Helpful numbers:

Dr. Oen Solo Baru: 0271 – 620 220
